About us

Bimecc Engineering is a leading European manufacturer specialized in fastening solutions and accessories for car alloy wheels. Proudly 100% Made in Italy, Bimecc combines innovation and precision engineering in its state-of-the-art production facilities, ensuring products that consistently meet and exceed the highest international standards.

Committed to excellence in quality and punctuality in delivery services, Bimecc continuously adapts to the increasingly competitive global market. To provide optimal customer support in Northern Europe and the USA, the company has strategically established warehouses in Hertfordshire, UK, and California, USA.

Bimecc Engineering is also complemented by its dedicated division, Plaxitech, specializing in the production of high-quality plastic materials, further expanding the company's capabilities and product range to meet diverse market demands.

“ Our Vision

A wrong fitting of a car wheel might be a safety problem.

Bimecc knows how to solve it.

“ Our Mission

Providing fastening solutions and accessories for car wheels.

To be an excellent supplier, with above average development and maintenance ideals specializing in state-of-the art wheel accessories.

We shall strive to excel in services rendered to our customers by consistently delivering the highest quality product and services on schedule.

R&D

Innovating and investing in Research & Development are among the main aims of Bimecc Company. Bimecc employs the most modern CAD/CAM software to develop its products. This guarantees high efficiency, high quality and short development times from concept to final approval.

Our machinery division uses the most advanced computerized systems and it is completely automated to achieve the highest production in the best quality and at low costs. Our high-precision production processes ensure that our products are well fitted for automated assembly lines.

Bimecc R&D and Engineering team are ready to work with its customers in order to ensure all the required specifications.

Customization

Besides personalized labeling and packaging, Bimecc with its flexible manufacturing capabilities offers to the customer a product customization service also.

In short time, starting from our standard range of products we can reduce the length of a thread or the outside diameter of a cylindrical head bolt as well reduce the cone of a conic nut.

We can also produce car wheel fasteners by customer drawing.

Quality

The main aim of Bimecc quality policy is to fulfill its customers' needs by a continuous improvement of its processes.

Every process in Bimecc follows ISO 9001 and IATF 16949 standards.

The quality system management controls both the conformity to the procedures of every single activity, according to ISO 9001 and IATF 16949, and the quality of its products. Bimecc guarantees an extremely high quality level by using the latest measurement tools for dimensional, corrosion and torque-tension tests.

Bimecc management system is "Risk-based Thinking", that means that Bimecc takes preventive actions in order to avoid any potential risk that could affect the quality of its product.

In 2017 Bimecc updated ISO9001 quality system certification in its last release: ISO9001:2015.

In the same year Bimecc achieved IATF 16949:2016, the quality system certification for automotive production.

TUV SUD Italia released both certifications.

Packaging

Bimecc offers a wide range of packaging.

Bimecc can save our customers time and money by custom packaging and labelling its parts to fit your needs. For requirements ranging from boxing parts to custom labelling, our Custom Packaging Department can help.

The Custom Packaging Department provides two primary services.

One service offers the option of packaging product to meet the specific needs of the customer. We can package specific parts with specific quantities in a variety of boxes or bags. We can also customize these packages' labels with information relating to the product.

The other service provided by Custom Packaging is maintaining sufficient inventory quantities of the parts offered in our catalogue in bulk version.

Safety

Bimecc cares about wheel safety.

In fact, our company is playing an active role to make wheel specialists and drivers more conscious of the relevant link between wheel fastenings and car safety. Our sales team is at your disposal for any information. If you are interested and you want to discover more about our campaign 'Bimecc Blister makes your car safer', please visit the web site: www.bimecc.it

WHEEL SPACERS

AVAILABLE IN DIFFERENT SIZES FOR ALL CARS AND MODELS - APPLICATION LIST AVAILABLE

To give your car the final visual and performance touch, Bimecc has created a complete line of Aluminum hub centric Wheel Spacers. They are designed to quickly and easily adapt your vehicle to a wider and more stable stance. They give your car a more aggressive look, improve handling performance and optimize the lateral stability! They extend wheel width for higher stability and increased safety. You can use wheel spacers to provide your car with an offset not offered by the wheel manufacturer.

40 TO 80 mm TRACK WIDENING

THICK SPACERS

This spacer is fitted to the hub with Bimecc Short Head wheel bolts and carries new threaded steel inserts for the existing wheel bolt.

40 TO 90 mm TRACK WIDENING

OFF ROAD TYPE

This spacer is fitted to the hub with Bimecc Short Head nuts and carries new wheel studs for the existing wheel nuts.

10 TO 40 mm TRACK WIDENING

LUG THROUGH TYPE

This spacer is fitted between the wheel and hub, using longer wheel bolts available in our range

- CUSTOM DESIGNED
- CNC MACHINED
- AVAILABLE FOR MOST CARS
- SUITABLE FOR OE OR AFTERMARKET WHEELS
- 4, 5, 6, 8 HOLES / STUDS
- DIAMOND CUT FINISHING

BENEFITS OF WHEEL SPACERS:

Redistributes center of gravity; reduces risk of rollover
Better traction and cornering
Vehicle can still use factory rims
Wider tires can be placed on the factory rims
Allows better control at greater inclined angles
Improved appearance!

The Shape of Evolution

EDGEX®

Bimecc's EDGEX® patented system is a new range of fastening products, specifically studied for small hole alloy wheels.

EDGEX® summarizes Bimecc's thirty-year experience in manufacturing alloy wheels fasteners.

EDGEX® reaches high level performances: reduced dimensions and weight, mechanical characteristics in compliance with international ISO standards, high resistance to corrosion over time, use of very high quality steel and last but not least a modern and innovative design.

EDGEX® consists of two product lines, bolts and nuts, whose main characteristic is the polygonal key made of two regular pentagons symmetrically disposed.

This particular geometry not only offers remarkable technical and functional advantages, but gives the product a captivating aesthetic aspect, which intensifies the design characteristics of the most modern alloy wheels.

EDGEX® is available with two surface treatments: white zinc plating or black zinc plating which has a very high resistance to corrosion.

The product is packaged in small cardboard boxes of 20/24/32 pieces and is supplied with two types of wrench: a wrench with a double hexagonal key and a socket wrench.

The advantages of EDGEX®

EDGEX® Bolts and Nuts represent a remarkable innovation which ensures great advantages for fitting:

- The polygonal Key guarantees more efficient torque transmission during tightening;
- The nut is a single piece. The EDGEX® nut guarantees protection from corrosion for life in comparison to a double piece nut, whose upper part – the spherical cap- could be lost over time and permit corrosion;
- The single piece nut is more resistant to impacts; the double piece could easily lose the spherical cap due to impacts;
- EDGEX® Bolts are verified Class 10.9. This class is obtained with a special heat treatment that guarantees 90% of tempered martensite in compliance with international standard ISO 898;
- The surface treatment, specifically studied for EDGEX®, both in black and white, completely protects the internal part of the nut, impeding the start of corrosion. So the thread remains intact over time;
- Bolts and nuts are supplied with EDGEX® keys, specifically designed for a precise coupling.

General Sales Conditions

1) These General Sales Conditions, unless for possible exceptions agreed upon in writing, regulate the sales contracts of Bimecc Engineering S.p.A.

2) Purchase orders received directly or through authorized sales agents are valid only when they are accepted by Bimecc Engineering S.p.A. with written confirmations; from the date of order confirmation and the execution of the order, Bimecc Engineering S.p.A. reserves the right to make all the modifications that may be considered useful and necessary for the good functionality of the ordered goods excluding that the purchase may arise any right cause for receding or asking any kind of compensation or indemnity of any nature whatsoever.

3) Prices on the current Bimecc Engineering S.p.A.'s price list are intended on ex works basis – EXW; they do include value added tax and transport but they do include packing in standard carton boxes and pallets (80x60x60 cm.). Customized packing must be discussed and will be charged separately.

4) Delivery dates can be postponed and are valid only with a written acceptance by Bimecc Engineering S.p.A. Cancellations of purchase orders of customized products is accepted within 5 working days from date of order. However, Bimecc Engineering S.p.A. reserves the right to charge its customers for all the expenses related to raw materials and/or for special tolls and machineries.

5) The goods sold by Bimecc Engineering S.p.A. is sold with reserve of property in favor of Bimecc Engineering S.p.A. until the whole price has been paid in compliance with art. 1523 and followings of the Italian Civil Code;

6) The transport charges are totally to the charge of the purchaser, unless otherwise agreed by Bimecc Engineering and its customers. Transport costs will eventually be calculated separately and charged in the commercial invoice. Bimecc Engineering S.p.A. reserves the right to decide autonomously and without any responsibility, the terms of shipment; it is understood that goods travel at the purchaser's own risk, which is expected to safeguard its own interests towards the carrier according to the terms of law; in particular, Bimecc Engineering S.p.A. is not responsible, independently of the shipping and delivery terms, for loss and damages of the goods.

7) The terms of delivery are intended in working days and start from the date of written confirmation of the order; however, they must be considered as merely approximate and, therefore, not binding for Bimecc Engineering S.p.A., which will establish the aforesaid terms according to the demands of its own production cycles; any delay in delivery due to any reason or the eventual partial execution does not give the purchaser the right to recede from the purchase order, or to pretend anything for direct damages, or to delay payment of the supply disregarding the agreed payment terms.

8) Any defects or deformities of the goods must be communicated to Bimecc Engineering S.p.A. in writing, within and not later than 7 days from the delivery of the goods, meaning for this purpose the date the purchaser signs the delivery note; it is however understood that Bimecc Engineering S.p.A. is not responsible for deformities, defects and/or damages caused by unauthorized works and modifications by improper use of the goods.

General Sales Conditions

9) Unless different agreed, Bimecc Engineering S.p.A. guarantees its products for one year from the shipping date, only for defects in projects design or manufacture that can be traced back to it and reported in writing; to this regard, after having verified the defects, Bimecc Engineering S.p.A. reserves the right to replace only the defected parts and, it is also understood, that the value of the guarantee cannot exceed the sum paid by the purchaser for the defective material.

10) Bimecc Engineering S.p.A. does not accept returned goods, unless previously agreed with Bimecc Engineering S.p.A., which, if it is the case, will authorize the return at the customers expenses.

11) Finally, it is understood that the characteristics of Bimecc Engineering S.p.A.'s products listed in our catalogue and web-site are merely indicative with the consequent obligation of the purchaser to check that they correspond to the meaning of use requested.

12) These Sales Conditions are subjected to the Italian Law. For any controversy that may arise regarding their correct interpretation and application, must be discussed by the court of Padua; these Sales Conditions have been drawn up in the Italian language and then translated in other languages with the consequence that, in case of any doubts, only the Italian text will be used to clarify any doubts.
